

Horizon Europe 2022 Call factsheet

Copernicus downstream applications and the European Data Economy

Copernicus data and services products will be at the core of the projects' data value chains and integration activities needed to fulfil the industrial and user requirements that will drive the actions.

Scope:

- Bring to market new or improved applications, products and services by exploiting Copernicus data assets and services products.

Topics:

- Contribute to increase the integration and uptake of Copernicus into the economy, and/or to solve societal challenges;
- The integration of Copernicus data assets with data contributed by other vertical domains into sizeable and scalable applications enabled by modern ICT technologies to enhance Copernicus downstream market and enable vertical domains (e.g. agriculture, food security, health, energy, natural resources, environmental monitoring, insurances, tourism, security etc...) to benefit from the use of Copernicus.

The indicative budget for this category is EUR 9.60 (Million).
